About Me

Full Stack Developer with 3 years of experience in Java, PEGA PRPC, Spring Boot and AWS. Built and deployed scalable solutions for a leading telecom client (Verizon). Integrated REST/SOAP APIs using Postman, and monitored application health using Kibana and CloudWatch. Skilled in front-end development using JavaScript and ReactJS. Experienced in working with databases (MySQL), Git and Agile methodologies. and Pega tools like Clipboard and Tracer for effective debugging.

Strong team collaborator with experience mentoring junior developers and working across QA, DevOps, and business teams. Driven by the opportunity to contribute to projects that make a meaningful impact.

Experience

Cognizant | Programmer Analyst

2023-Present

- Worked on **Java, Pega PRPC and Spring Boot** to develop and maintain scalable backend services for enterprise applications.
- Designed and integrated **REST/SOAP APIs** using Postman for testing, and managed data using **MySQL**.
- Utilized basic **ReactJS and HTML** for building responsive and dynamic user interfaces.
- Developed and deployed scalable backend solutions using AWS services such as **EC2, IAM, Lambda, S3, and RDS** ensured secure access and high availability through **VPC** and **CloudWatch monitoring**. Used **Git/GitHub** for version control and collaboration.
- Followed **Agile methodology**, participated in sprint planning, and used **AWS Cloud Formation** for build automation and CI/CD pipelines for deployment.

Lattech | Intern

2022-2023

- Interned on a hospital management project, developing **REST API**, **Java** and integrating **Firebase** databases.
- Gained Agile experience, delivering tasks on time and participating in iterative development cycles.

Skills & abilities

Languages: Java, JavaScript, HTML, MySQL, Oracle DB, Python.

Frameworks: Spring Boot, ReactJS, REST/SOAP API.

Technologies: PEGA, AWS Cloud Services, GitHub.

Tools: Postman, Jira, Jenkins, Kibana, Elastic Search.

Education

Computer Science And Engineering (BE) SDM College of Engineering and Technology	2020-2023
Computer Science And Engineering (Diploma) BVVS Polytechnic (Autonomous), Bagalkot.	2017-2020

Certifications

- AWS Solution Architect Practitioner
- Certified SAFe® 6 Practitioner
- PEGA Certified Senior System Architect (PCSSA)
- Java Full Stack Certification
- Java and SQL certificate by HackerRank

Projects

Client: Verizon Communications (Telecom Domain)	Role: Java/Pega Developer
Project Description: Developed a comprehensive telecom order management system for Verizon, enabling real-time tracking of customer orders including mobile devices, SIM activations, port-ins, exchanges, and accessories. The platform helped reduce order failures and improve customer satisfaction by ensuring transparency and timely updates across systems.	

Key Responsibilities:

- Developed backend services using **Java** and **Spring Boot** to integrate with internal and external APIs.
- Designed and implemented **RESTful APIs** for seamless data exchange across order systems.
- Built and customized workflows in **Pega PRPC** to manage order cases and automate business logic.
- Utilized **SQL** for querying and managing relational databases; integrated with **Oracle DB** and **Cassandra**.
- Integrated monitoring tools like **Kibana** to track API logs, identify issues, and perform root cause analysis.
- Used **Postman** for API testing, validation, and regression checks.
- Managed and configured **AWS services** including EC2 for server deployment and IAM for secure access control.
- Participated in **Agile practices**, including daily scrums, sprint planning, and retrospectives.

Technologies Used:

Java, Spring Boot, SQL, Pega PRPC, Pega CDH, REST APIs, Postman, Kibana, Oracle DB, Cassandra, Elasticsearch, AWS EC2, AWS IAM.

Achievements

- Successfully delivered a high-impact order tracking system for Verizon, enhancing customer experience across multiple purchase scenarios.
- Recognized by the Business Unit (BU) for reducing production defects by 10%, demonstrating strong problem-solving skills and attention to detail.
- Recognized by BU team at Cognizant for outstanding performance and dedication.
- Mentored 3 junior developers, contributing to faster onboarding and higher team productivity.
